1994-1995 Member, Defense Policy Review Council
1999- Board Member, Institute for Democracy and Electoral Assistance
1993 Global Leader for Tomorrow, selected by the World Economic Forum
1983-1984 Visiting Fellow, Center for International Affairs, Harvard University
1981-1990 Associate Professor, Faculty of Law, Sophia University

Speakers

Dr. Thomas Malone
Professor, MIT Sloan School of Management

One of the two founding co-directors of MIT's Initiative on "Inventing the Organizations of the 21st Century," Thomas Malone is a visionary proponent of new organizational designs that take maximum advantage of information technology's expanding possibilities.

For two decades, Malone has consistently led the field in exploring how the organizations of the future will be structured. His book, *The Future of Work: How the New Order of Business Will Shape Your Organization, Your Management Style, and Your Life*, foresees a workplace revolution that will dramatically change organizational structures and the roles that employees will play in them, and provides the first credible model for actually designing the company of the future. Thomas Malone is Patrick J. McGovern Professor of Information Systems, MIT Sloan School of Management and founder and Director of the MIT Center for Coordination Science.

Based on twenty years of groundbreaking research, *The Future of Work* proposes that current notions about decentralization merely scratch the surface of what will be possible as technological and economic forces make "command and control" management less useful. In its place will be a more flexible "coordinate and cultivate" approach that will spawn new types of decentralized organizations, from internal markets to democracies to loose hierarchies. These future structures will reap the scale and knowledge efficiencies of large organizations while enabling the freedom, flexibility, and human values that drive smaller firms. Professor Malone goes beyond issues of architecture to define the skills managers will need in a workplace in which everyone shares the power to decide.

This optimistic book shows how we can help create a world that is not just richer, but better. Professor Malone has a long record of anticipating trends in the structure of work. In the mid-1980s, he predicted many of the major developments that drove change in the 90s: electronic markets, outsourcing and the use of intelligent agents for commerce. More recently, he's outlined the emergence of the "e-lance economy." Malone has co-founded three software companies and was a former research scientist at Xerox Palo Alto Research Center. An inventor with ten patents, Professor Malone has published over fifty articles, research papers and book chapters. He's edited three books, including *Inventing the Organizations of the 21st Century*.

Speakers

Dr. Seija Kulkki
Director, Center for Knowledge and Innovation Research (CKIR),
Helsinki School of Economics

Dr. Seija Kulkki is the director of Center for Knowledge and Innovation Research (CKIR) at Helsinki School of Economics. CKIR conducts research on renewal and growth of companies and societies based on knowledge and innovation both locally and globally. CKIR is connected to other famous knowledge-related research centers around the world. Professor Ikujiro Nonaka from Hitotsubashi University in Tokyo, Japan is the Visiting Dean at CKIR, Professor Yves Doz from INSEAD in France and Dr C. Otto Scharmer from MIT in United States hold positions as Visiting Professors, and Emeritus Professor James G. March as an Advisory Board Member.

Dr. Kulkki conducts research on multi-located R&D activities of globally operating firms as a part of a larger international research project with researchers from Hitotsubashi, INSEAD and MIT. The focus of the research is the operating and management models that are necessary for managing the global and multi-located knowledge creation in multinational firms. The project brings together Finnish, European, Japanese and American companies.

Dr. Kulkki's article (2001) together with Dr. Mikko Kosonen, Senior Vice President of Nokia Group describes the path of Nokia from a locally diversified to a globally focused, high-performance telecommunications firm. The transformation of Nokia is discussed as a process of renewal where the focus has been placed on the dynamism of individual and organizational tacit knowledge. The article discusses the future-oriented nature of tacit knowledge that explains the company's ability to create new markets and to renew and grow. Article discusses also the effects of globalization on the organizing and managing of Nokia's international research and development operations.

Dr. Kulkki has also published a conceptual article on knowledge creation in global firms (Oxford University Press, 2002) that concerns the creative and integrative capability of a firm to synthesize the local knowledge of customer and market behavior from all over the world with a globally distributed technological competence. During 2004 Oxford University Press will publish a book on management and organization of knowledge-based firms. In the book Dr. Kulkki and Professor Nonaka discuss knowledge, knowledge creation and learning theories as the basis for further development of knowledge-based theory of a firm.

Speakers

Dr. Kulkki defended her doctoral thesis in Helsinki School of Economics in 1996. Her dissertation concerns knowledge creation in multinational companies. The dissertation develops further the theory of organizational knowledge creation built up by professors Nonaka and Takeuchi in 1995, from the multinational company's point of view. Professor Nonaka also acted as her opponent. The dissertation discusses knowledge creation as a dynamic interaction of individuals, organizations and environment. New organizational knowledge emerges out of shared experiences, especially in demanding situations of problem solving and discontinuity.

During 1997-2000 Dr. Kulkki has been a visiting researcher in INSEAD, France; in the Institute of Innovation Research (IIR), in Hitotsubashi University in Tokyo; as well as in Scancor (Scandinavian Consortium for Organizational Research) in Stanford University, USA.

Sir Christopher Bland
Chairman, BT Group plc

Sir Christopher joined BT as Chairman on 1 May 2001. He was Chairman of the BBC Board of Governors from April 1, 1996 until September 30, 2001. Sir Christopher became Chairman of the Royal Shakespeare Company on 18 May 2004 and is the Chairman and major shareholder in Leith's School of Food & Wine and Canongate Publishing. He is a Senior Adviser to Warburg Pincus.

He has extensive media experience, both of the industry and as a regulator. He was Deputy Chairman of the Independent Broadcasting Authority from 1972 to 1979 and Chairman of its Complaints Review Board during the same period. In 1982 he became a non-executive director of LWT (Holdings) plc and Chairman in 1983, a post which he held until 1994.

Born in Japan on May 29, 1938, he was educated at Sedbergh School, Yorkshire and The Queen's College, Oxford where he gained a degree in modern history and is an Honorary Fellow.

Sir Christopher became Chairman of printers and publishers Sir Joseph Causton and Sons from 1977 to 1985; he was Chairman of the Century Hutchinson Group from 1984 to 1989; a director of National Provident Institution from 1978 to 1988; and a director of Storehouse plc from 1988 to 1993. He was Chairman of NFC plc from December 1994 to May 2000, and was Chairman of Life Sciences International plc from 1987 to March 1997.

He has a keen interest in health issues. He was Chairman of the Hammersmith and Queen Charlotte's Hospitals Special Health Authority from 1982 to 1994 and of Hammersmith Hospitals NHS Trust from 1994 to February 1997. He was knighted for his work in the NHS in 1993. He was Chairman of the Private Finance Panel from 1995 to 1996 and a member of the Prime Minister's Advisory Panel on the Citizen's Charter.

Sir Christopher has one son, two stepsons and two stepdaughters. He captained the Oxford University Fencing and Modern Pentathlon teams and in 1960 he was a member of the Irish Olympic Fencing Team.

Speakers

Mr. Waichi Sekiguchi
Editorial Writer, Nihon Keizai Shimbun, Inc.

Waichi Sekiguchi graduated from Hitotsubashi University and joined Nihon Keizai Shimbun, Inc. in 1982. Mr. Sekiguchi currently covers the Japanese IT industry in Tokyo. He was a Washington correspondent during the Bush and first Clinton Administrations, covering US trade and government policies.

Prior to that, he was a research fellow at the Center for International Affairs at Harvard University and a chief writer for Nikkei Weekly. He became a senior staff writer of Business News Department in 1996, and an editorial writer in 2000. He has also written books on the Internet and IT industry. Titles include "Cyberspace Revolution", "The Frontier of Cyberbusiness", "Moderntimes 2001", etc.

He is a visiting professor at Hosei University and he teaches at Hitotsubashi University and Waseda University as a part-time instructor.

He is also a member of the Japanese government copyright council and the government security culture council.

Speakers

Mr. Alex Vieux
CEO, Publisher, Red Herring, Inc.

Alex Serge Vieux is publisher of Red Herring and CEO of Red Herring Inc. Drawing on his extensive expertise as a high-tech journalist, entrepreneur, professor, and advisor to the French government, Mr. Vieux is responsible for steering the growth of the organization and guiding the publication's vision. He is also chairman, CEO, and founder of DASAR, an international organization producing exclusive international IT conferences.

In 1985, Mr. Vieux reported as a U.S. business correspondent for France's leading daily newspaper, Le Monde, where he covered news and issues affecting the technology sector. His contributions to the IT industry span more than 20 years and include co-founding two banking software companies, CATS and Renaissance Software, as well as DASAR, a European incubator and conference company. Repeatedly named by Time magazine as one of the top 25 people shaping a Digital Europe, Mr. Vieux has been elected to the Board of Directors of ten public companies, including Tandem Computers (until the company's merger with Compaq), Computer Associates, Commerce One, BVRP, and Check Point Software. Mr. Vieux recently joined as executive director of several international public and private companies, including Daum Communications, Kyriba, and Qualys.

Mr. Vieux has held positions at the University of Paris Dauphine and the Universite de Paris Sorbonne, lecturing on the development of the IT industry. He was a special advisor to the French Minister of Finance, Industry and Economics, from 1991 until 1993, and served as president of the French Republic's Infotech Commission between 1997 and 1999.

Mr. Vieux is a graduate of the Institute d'Etudes Politiques and the French business school HEC. He also holds a law degree from the Universite de Paris and an MBA from Stanford University, where he was a Fulbright Scholar.

Speakers

Mr. Blake Krikorian
CEO, Co-Founder, Sling Media, Inc.

An experienced entrepreneur, Blake Krikorian co-founded Sling Media after founding and serving as the CEO of id8 Group Holdings, a firm which both advised industry-leading companies on product strategy and invested in new product creation. id8 Group's client list has included, among others, Microsoft, AMD, ARM Ltd, AT&T, Toshiba, Hitachi, Vulcan, Inc., Samsung Electronics, and Time Warner.

Blake started his career at General Magic, which created the Magic Cap operating system for mobile intelligent communicators and Telescript, an agent-based network programming language for the emerging electronic marketplace (pre-Internet). At General Magic, Blake assisted industry-leading telecom and consumer electronics companies, including NTT, Sony, Mitsubishi Electric, Sanyo, OKI, and Matsushita/Panasonic, in creating and defining new products, and partnerships.

In 1994, Blake co-founded the Philips Mobile Computing Group, which was funded by Philips Electronics. As group product manager, he built and co-led the team that defined, created, delivered, and marketed the award-winning Velo 1 Windows CE Handheld PC and its associated product line.

Blake then left Philips Mobile Computing Group to serve as Senior Vice President at Metis Associates, an information technology consulting firm and incubator of core technology companies. He led the creation of Metis' first incubated company, Mainbrace Corporation, which developed and licensed software technologies and manufacture-able device platforms to system OEMs, service providers, and semiconductor vendors. Blake's served as the company's President for the first two years of its operation. Mainbrace was acquired by BSQUARE in 2000.

Blake holds a Bachelor's Degree in Mechanical Engineering from UCLA.

Speakers

Mr. Rob Glaser
Chairman and CEO,
RealNetworks, Inc.

Since founding RealNetworks in 1995, Rob Glaser has played an integral role in transforming the Internet into a mass medium. Under Glaser's direction, RealNetworks introduced the groundbreaking RealAudio product, followed quickly by RealVideo, RealPlayer and RealSystem technologies, moving television and radio from broadcast to the Internet. Since 2001, Glaser expanded RealNetworks through a quick succession of innovative, award-winning online subscription services including: Rhapsody, the #1 ranked on-demand music service; RealArcade, the #1 ranked casual gaming service; and Starz! Ticket on Real Movies. As a direct result of Glaser's leadership, RealNetworks now boasts over 1.55 Million paying subscribers.

With the growth of broadband and mobile networks, RealNetworks is expanding beyond the PC to mobile devices and home entertainment. Close relationships with Comcast, Nokia, Ericsson, and Sony are paving the way for content to flow from the Internet to many devices - reaching consumers where and when they want.

Prior to founding RealNetworks, Mr. Glaser worked for Microsoft from 1983 to 1993 in a number of executive positions, including Vice President of Multimedia and Consumer Systems. Mr. Glaser has served on several non-profit boards and committees, including his appointment by President Clinton to the Advisory Committee on Public Interest Obligations of Digital Television Broadcasters.

Mr. Glaser is a graduate of Yale University, with a BA and an MA in Economics and a BS in Computer Science.

Mr. Hisayuki Ishizumi
Vice President,
Hewlett-Packard Japan, Ltd.

Hisayuki Ishizumi is Vice-President of the HP Services (HPS) for HP Japan. HPS helps organizations obtain maximum business value from their IT investments by providing hardware systems, software and services that enable them to quickly adapt to changing business conditions and strategies for managing their future growth. Ishizumi leads a team that is responsible for approximately two-thirds of HP's business in the country.

Ishizumi joined HP Japan in 1977 as a practice manager with the Financial Solutions Group. He gained extensive experience through a series of country and regional roles spanning engineering, consulting, sales and pre-sales support, as well as business management experience in the fields of network & service providers, enterprise storage & servers. He was appointed a Vice-President of HP in 1992. Prior to assuming his current role in May 2004, Ishizumi was Vice-President & General Manager of HP's enterprise storage & server business in Japan.

To achieve and maintain HP's leadership in the enterprise space, Ishizumi focuses on developing stimulating culture based on the principles of continuous improvement of people, processes and technologies.

In addition to his HP responsibilities, Ishizumi serves as the executive director of the Research Environment for Global Information Society and Director for the Technical Committee on Ad Hoc Networks in Japan.

Born in Hokkaido, Ishizumi holds a Bachelor's degree in econometrics from the Otaru University of Commerce in Japan. At leisure, he enjoys Kendo and golf, and is an avid photographer.

Mr. John Kelly
Board of Directors,
Co-Chair, CATA Alliance

John Kelly is the Chairman of NexInnovations Inc. and a principal at Reid Eddison Inc., a Canadian technology mentoring company.

Throughout his 40 year career, Kelly has been an innovator and has held a number of senior executive positions in the Canadian technology sector. From 1995 to 1999, Kelly was the President and Chief Executive Officer of JetForm Corporation. JetForm is a global leader in providing E-Process software solutions subsequently acquired by Adobe. Kelly founded and was Chief Executive Officer of Why Interactive, Canada's first interactive multimedia development company. He was a founder and Chief Executive at both Computer Innovations Distribution Inc. (which later became EDS Innovations, and now NexInnovations) and Nabu Network Corporation, a pioneering cable-based software and information distributor. Kelly was also a founder of SHL Systemhouse Ltd. (since acquired by EDS), where he served as Senior Vice President and Chief Operating Officer from its inception in 1974 until 1980.

In 1997, Kelly won two significant awards: he was recognized as High Technology Citizen of the Year for the City of Ottawa and also as Master Entrepreneur of the Year for the province of Ontario. In 1998, he also won the Ottawa Business Journal's poll for Most Respected CEO for the City of Ottawa. In 1999, he won the Ottawa Centre for Research and Innovation (OCRI) Civic Entrepreneur of the Year Award. In November 2000, Kelly received the Outstanding Volunteer Fund Raiser Award from the Ottawa Chapter of the NSFRE (National Society of Fund Raising Executives). That same year, Kelly received the Mentor of the Year Award from the Province of Newfoundland. In May 2001, Kelly was chosen Ottawa's Business Man of the Year for 2001 by the Consumers' Choice Award and Market Facts Canada. In November 2004, Kelly was inducted into the CIPA (Canadian Information Productivity Awards) Hall of Fame. In May 2005, Kelly received the United Way Volunteer of the Year Award. In June 2005, Kelly received The Brother Arthur A. Loftus Award for Outstanding Achievement in Business from Iona College.

Kelly holds an honors law degree (LL.B) from the University of Ottawa and an honors B.B.A. degree (Finance) from Iona College in New Rochelle, New York. He won the Gold Medal Award in Finance and the Wall Street Journal Award in Commerce from Iona College. He also holds an honorary doctorate from the University of Ottawa (1998). Kelly was Chair of the Canadian Advanced Technology Alliance (CATA) from 1998-2000 and is currently Co-Chair. He is past Chair of Innovators Alliance, an advisory council to the Government of Ontario with members representing Ontario's fastest growing companies. He is Co-Chairing Ottawa's Bid Committee to be the Canadian host city for the 2014 Commonwealth Games.
